

Kő papír olló

A játék lényege:

A játékosok hangosan a kő – papír – olló-t mondják, minden szónál megemelve az ökölbe szorított kezüket. A harmadik szó után, vagy az utána következő ütemben a játékosok kezükkel felveszik a három alakzat egyikét és megmutatják az ellenfelüknek.

Jelzések:

- kő: zárt ököl
- papír: nyitott tenyér
- olló: kinyújtott, szétnyitott mutató és középső ujj

A cél az, hogy olyat mutassunk, amely legyőzi a másikat:

- a kő kicsorbítja az ollót: a kő győz
- az olló elvágja a papírt: az olló győz
- a papír becsomagolja a követ: a papír győz
- Ha mindketten ugyanazt mutatják, a játék döntetlen és újat játszanak.
